

# 'Learn to read our hearts...'

**1** Don't crib about the time we take to get ready when going out. It is natural that we want to look good for you, so please understand!

**2** It is not only a man's right to have a temper! Yes we women also do get angry so be by our side in those moments instead of flipping on us for having a temper!

**3** Tantrums are inherent, so instead of complaining about the number of tantrums we throw, just find ways to deal with them!

**4** Not all women are big food-ies but it is important that you know what our favourite food or favourite restaurant is. Such small things go a long way!

**5** Yes, equality is important but when taking a girl out, remember it's a boyfriend's job to pay for everything! Girls don't want to spend a penny when they are out with their man!

**6** Yes we love to shop and we love it even more when our purchase is appreciated! So keep the compliments coming for all the new goods we buy!

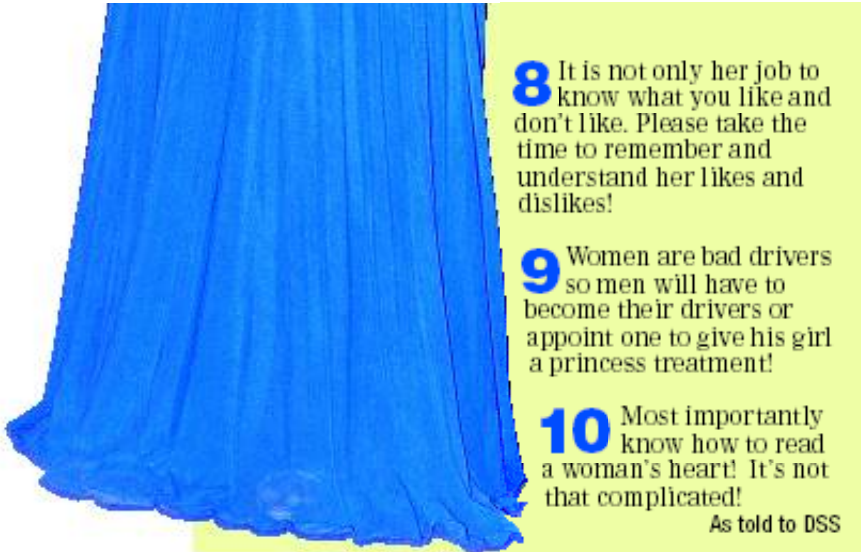

**7** Never and that means NEVER praise another woman when the girl who is the centre of your world, is around.
